SELF STATEMENT

[Continued on Next Page]

My focus as a Digital Media Artist is in specializing as a Video Game Designer / Developer for VR primarily. I want to incorporate 2D / 3D animation & video production in VR. That is what I'd like to do with my degree as well as eventually become a VR art director creating the "look 'n' feel" conceptualization of environments and characters for the game development industry.

SELF STATEMENT

[Continued from 1st Page]

I feel I am well suited for this career specialty because I have an eye for drama with my theater background, for the theatrical and fully realized production values - great music, etc. I work quickly and have created 3 complete video game titles [RIPPLES, TOWNIES & HUGS-N-HAUNTS] to-date 2D/3D projects both on my own and in a group setting. I enjoy both ways of working. I find the process to be stimulating either way.

I have experience using Unity 2D & 3D, Maya, 3D Studio Max, and Storyboard PRO - Photoshop, Illustrator and found these programs adaptable to learning other similar programs.

My skill set is such that at The Animation Mentor School I learned about storytelling and creating compelling scenes. And here at University of Florida's Digital World Institute I learned how to tie it all together - the aesthetics with intense programming/software development to create an attractive fully functioning finished product. I have attended the 3D Training Institute where I learned to work in a production pipeline. Pratt Manhattan where I learned traditional 2D animation and Software Development as well as worked in 3D Studio Max doing character modeling, motion graphics & rigging production, attended the High School of Art & Design where I took Theater Arts & Illustration, Fashion Institute of Technology where I learned all about interactive media prototyping, and graphic design and got my Associates Degree.

In 5 years, I'd like to be creating unique cinematics titles for full immersion in VR. I would like to find a challenging position in VR as a game designer/developer, combining video production & concept artistry, at an innovative company with whom I can grow long-term, and eventually become a Director utilizing my accumulated expertise and vast experience.
